

A Reputation for Problem Solving

Points North is a nationally recognized software firm that's an industry leader in data integration solutions. Our solutions provide integration between HR, Payroll and Time & Labor systems, enabling hundreds of companies across the U.S. to automate their data and work-flow processes.

This automation provides increased accuracy and efficiency, ultimately impacting the overall company performance. With outstanding product delivery combined with world class customer support, Points North is the right direction when it comes to data integration solutions.

We don't simply implement effective solutions to complex data integration challenges. We also develop the solutions, providing added value to out-sourced solutions and in-house applications.
